Presented by Orange County Mayor Jerry L. Demings

The Florida Simulation Summit is pleased to offer community service hours for students

Students can obtain **five** community service hours by attending all sessions after the education keynote and completing a survey.

The program will feature a keynote presentation by acclaimed computer scientist and virtual reality pioneer Dr. Carolina Cruz-Neira, University of Central Florida and the presentation of National Center for Simulation School Awards honoring K-12 as well as technical school education leaders making strides in Science, Technology, Engineering or Mathematics (STEM).

This exciting session will also show case a number of education-specific applications such as STEM principles in the most self-explanatory methods that integrate fun interactive elements proven to increase student engagement and learning outcomes. These methods also include using augmented and virtual reality to reduce student anxiety as well as vicarious training for educators using technologies which provide the virtual point of view of students with disabilities.

Community Service Requirements and Eligibility

- View the entire education keynote, Carolina Cruz-Neira, Ph.D. and the afternoon panel sessions. You can access the segments by forwarding the video to hour 5:22. You must watch the entirety of these sessions to qualify for the community service hours.
- Complete this survey and allow for one week processing time to obtain your Community Service Proposal form signed by an authorized Orange County representative.
